## EXECUTIVE SUMMARY

Phase Two Early Child Development for the Future (ECD) project proposal is a project in association with the Rotaract club of Uganda Technology and Management University (RUTAMU) sponsored by the Rotary Club of Kampala Day Break. The thrust of RUTAMU is to assist the school in rehabilitating infrastructure and learning materials. RUTAMU is an organization aimed at supporting innovative community initiatives that promote education, health and entrepreneurship among people.

## ORGANIZATION MISSION

The mission of our club is **Service above Self**; to provide service to others, promote integrity, and advance world understanding, goodwill and peace through its fellowship of business, professional, and community leader.

## ORGANISATION VISION

RUTAMU is peaceful co-existence and development in which everyone participates equally and effectively in problem and solution identification and where local communities, governments and other development bodies facilitate and carry out skills transfer to younger generation who are not fortunate enough to be afforded or even go to school.

## PROJECT RATIONALE

RUTAMU's strategy to improve Bukasa has been done in different phases of which the 1<sup>st</sup> phase of the project work started on September 15<sup>th</sup> 2017 and has been a success like planting of a live fence, construction of an incinerator for proper garbage disposal, menstrual hygiene lessons.

In phase (2) of the project which was executed on September 21<sup>st</sup>, 2018, the club refurbished the library by donating library shelves, tables and chairs. In a bid of sustainable projects, we opted to purchase high end book shelves that will be long lasting as advised by our service provider after he had given us all options. This eventually cost us highly and we eventually provided only a few book shelves and one desk.

RUTAMU is now going on to raise more funds for the purchase of more shelves in the library, more textbooks, chairs and tables. Implementation will include construction of book shelves, provision of materials such as text books for all subjects, chairs and tables.

## PROBLEM STATEMENT

After delivering and launching our library project to the school, we realized that the state of the library has been improved but there is need to put it to a modern state library. There is need for more book shelves so that the books are well organized in the library and easier to locate in times of need. The library also needs more text books to facilitate children in their studies as well as the teachers. The library walls also need to be painted to enhance beauty and create an attractive reading environment for the children since children do well with colors.

### The objectives:

To construct more book shelves in the library of Bukasa primary school, provide more textbooks and also provide more chairs and tables to be used in the school library.

## CONCLUSION

RUTAMU will adopt the policy of corporate good governance throughout the implementation process of this project. This will ensure accountability and transparency in the management of resources. Thus we need your financial support to restore the school library to a modern world class library and the school to its glory for your generosity gets us a step closer to our goal.
